# AMERICANA GLOBAL

Our vision is to simplify the overcomplicated detailing market and offer an easy to use system that instills confidence every time you use our products. Americana Global's proprietary car care system has been designed for professionals and car enthusiasts that strive for perfection, quality and time efficiency.

Our products have been researched and engineered to the highest standard to achieve the best results on the market. Quality, excellent craftsmanship, and superior products! That is what you can expect when purchasing our products.

**QUALITY PRODUCTS MADE IN THE USA**

## ELEVATE YOUR CAR CARE GAME

Americana Global's mission is to develop products that produce exceptional results while elevating the standard of detailing. Our 4-Stage Car Care System equips detailing professionals and automotive enthusiasts with chemicals and paint protection supplies that work harmoniously to help -

**PREPARE | CORRECT | MAINTAIN | PROTECT**

### 1 Prepare

Prep work is crucial in creating long lasting results. Our tested and proven products create clean slate surfaces that are ready to be transformed.

### 2 Correct

Modernizing the paint correction process is one of our goals at Americana Global. Our cutting edge polishing system pairs compounds and pads for a straightforward process that achieves faster results.

### 3 Maintain

Modern maintenance solutions that care and preserve the quality finish on any surface. Specially designed to work on modern protection systems like ceramic coatings, paint protection films & vinyl wraps.

### 4 Protect

All vehicles need protective products that are quick and effective. Americana Global's protective products enhance and protect the results on the flawless finish.

# PREPARE

# 01

The Americana Global Step 1 Category of prep detailing products allows professionals and DIY enthusiasts to accomplish this phase quicker, faster, and more cost-effective.

# 1.

## WHEEL & TIRE CLEANER

Americana Global Wheel & Tire Cleaner is the newest evolution of wheel and tire cleaners. The 2-in-1 cleaner is designed to streamline the process of wheel and tire detailing. Our Wheel & Tire cleaner is a non-acid, high foaming formulation that cuts through brake dust, grime, light corrosion, dirt, and old caked-on tire dressings.

This product is safe on all tires, painted or powder coated (with a clear coat), clear coated, chrome, factory, and ceramic coated wheels.

\*PLEASE NOTE: Do NOT use on wheels that are warm to the touch. Make sure to spray off wheels and tires with water first prior to spraying Wheel & Tire Cleaner on them.

### TASK

Non-Acid Wheel and Tire Cleaner. Safe to use on most wheel types. Spray-on, agitate, and spray off solution.

### SIZE:

16oz & 1-Gallon Container

### NON-ACID BASED CLEANER

Some wheel cleaners on the market contain acids – which can cause pitting, surface, damage, and cause contamination on brake rotors and pads when sprayed. Americana Global Wheel & Tire Cleaner is an aggressive cleaning agent, with strong surfactants that help to dilute brake dust, road grime, and oils – without causing damage to the surface.

### EXCEPTIONAL TIRE CLEANER

Our Wheel & Tire Cleaner is a simple to use, spray on – agitate – rinse off solution. It's designed to breakdown road grime that can embed inside of tire sidewalls and tread. This leaves your tires looking factory-fresh, and ready for a non-sling, water-based tire shine.

### CRISP CINNAMON AROMA

We've infused a cinnamon scent into this tire and wheel cleaner. While it does not impact performance of the product, it does enhance the user experience.

### EASY-TO-USE SPRAY NOZZLE

Our 28/410 spray nozzle features a revolutionary high-volume pump mechanism, which delivers an ample amount of cleaning agent onto the vehicle surface. This not only helps you save time in applying the product, but it also helps to reduce overuse – which can save you money.

## DIRECTIONS

- Always make sure the wheel is cool before applying Americana Global Wheel & Tire Cleaner.
- Rinse the wheel and tire with fresh water FIRST before the application. This will remove excess debris and allow the chemical to penetrate stubborn brake dust and contaminants.
- Once the wheel and tires are wet and cool to the touch, spray one wheel and tire at a time.
- Spray tire and wheel surfaces liberally and let our Wheel & Tire Cleaner dwell for 1-2 minutes.
- Use a wheel brush if build up is particularly heavy. Rinse wheel and tire thoroughly with water.
- Do not allow product to dry onto any surfaces.

**WARNING:** DO NOT SWALLOW. If ingested, please seek medical attention immediately.

# 1.

## IRON & FALLOUT REMOVER

is a professional grade environmental decontamination product. It is specifically engineered to dissolve embedded ferrous-based contaminants such as carbon, iron, and other naturally occurring metallic substances from painted and clear coated surfaces. Industrial fallout is derived by manufacturing processes involving carbon and ferrous-based substances.

These microscopic particles are attracted to metallic surfaces (such as vehicle body parts) and eventually bond directly to the surface. Over time, these microscopic materials infuse directly to the substrate, which can lead to scratching or permanent surface damage.

### TASK:

Decontamination spray. Removes ferrous-based materials including industrial fallout, brake dust, rail dust, and carbon-based substances. To be used as a decontamination product, prior to clay bar treatment, paint correction, or applying any paint protective solution.

### SIZE:

16oz, 32oz, 1-Gallon Container

### PH NEUTRAL FORMULA

Our Iron & Fallout Remover is a pH neutral solution, meaning that it is safe to use on all vehicle surfaces including windows, clear coats, single-stage paints, and other metals. It's designed to be used in ventilated areas or outdoors in shaded areas.

### FAST ACTING IRON REMOVER

This new and improved iron remover goes to work instantly. As the product is sprayed on the surface, our proprietary blend of ingredients begins to dissolve iron particles. You can see it working as those ferrous materials slowly change to a purple color.

### MADE IN THE USA

Like ALL Americana Global products, our Iron & Fallout Remover is 100% made in the United States. Each product is manufactured using advanced chemical blending and filling procedures, with extreme attention to detail and product consistency.

## DIRECTIONS

1. Shake well before use.
2. Do not apply this product in direct sunlight or any substance that is warm to the touch.
3. Clean the surface with soap and water prior to using Iron & Fallout Remover.
4. Use the spray nozzle to apply and saturate the desired surface, agitate with a brush, sponge, or Microfiber towel.
5. Allow the product to sit for 5 min. Once Release has activated it will bleed purple. Do NOT allow the product to dry on any surface.
6. Rinse thoroughly with water or power washer if available.
7. Americana Global recommends washing your surface with SOAP or Rinseless Wash after using Iron & Fallout Remover. This will fully remove any chemicals from the surface. For an optimal paint correction experience, follow up by using Americana Global Surface Prep.

**WARNING:** DO NOT SWALLOW. If ingested, please seek medical attention immediately.

# 1.

## SURFACE PREP REMOVER

The Americana Global PREP & CORRECT steps end by using Americana Global Residue & Oil Remover. It's a scientifically formulated surface prep spray that is infused with Isopropyl Alcohol, surfactants, and other solvents that preps a surface for paint correction, or installation of paint protection products.

It is designed to remove existing waxes, polymers, oils, and residue – leaving your substrate surgically clean and prepped before and after paint correction. We recommend using this product BEFORE buffing or polishing, and AFTER paint correction – to ensure a perfectly clean surface.

**TASK:**

Decontamination of Surface Debris (Pre and Post Paint Correction). Used as a stripping agent – to remove residue, wax, oil, grease, and soaps.

**SIZE:**

**16oz, 32oz, 1-Gallon**

### EXCELLENT CERAMIC COATING PREP SPRAY

Always ensure your surface is surgically clean before installation, it's the key to longevity and producing that amazing shine. Americana Global Surface Prep Spray was initially formulated as a prep product to be used right after paint correction. This permits the ceramic coating to bond directly to the substrate – which provides a stronger installation, helps the coating last longer, and performs better.

### PERFECT FOR PPF & VINYL INSTALLATION

This oil and residue remover is also exceptional for prepping a surface for paint protection film and vinyl. These products depend on adhesives to bond to paint clear coats. When you use Americana Global Surface Prep Spray as directed, the vinyl or PPF will bond easier, quicker, and with more integrity. This helps ensure longevity, extends your product lifespan, and saves you time.

### READY TO USE SURFACE PREP SPRAY

We formulated our Surface Prep Spray as a ready-to-use product – meaning there is no wasting time trying to find that perfect dilution ratio to mix yourself. This not only saves you time, and money – but also reduces the potential of damage to soft surfaces like window seals and exterior trim pieces. Simply spray it on the surface, wipe it clean with a fresh microfiber towel – then flip the towel over to remove the excess.

### SAFE FOR INDOOR OR OUTDOOR USE

Unlike concentrated IPA or paint strippers, Americana Global's Surface Prep Spray is safe to use indoors (with proper ventilation) or outside. While we don't recommend using the product in direct sunlight, or on a surface that is warm to the touch, it can be sprayed and applied in outdoor conditions. This makes it convenient for professional detailers with auto salons, mobile technicians, or the DIY enthusiast.

## FOR OPTIMAL RESULTS

- Use solvent-resistant gloves.
- Do NOT use it on any surface that is hot to the touch. Avoid using in direct sunlight.
- Use a lint-free microfiber cloth for removal and buffing.
- Saturate the desired surface and let stand 1 minute before removal.
- Always test the product on a small inconspicuous area for an adverse reaction.
- Use one towel to do your first wipe, second clean towel for final buffing.
- Do not use on a freshly painted surface (adhere to manufacturing guidelines).

\*If you're going to use our Surface Prep Spray indoors, please make sure to wear an N-95 mask to protect your respiratory system from potential long-term impacts.

**WARNING: DO NOT SWALLOW.** If ingested, please seek medical attention immediately.

# 1.

## ALL PURPOSE CLEANER — CONCENTRATE

Americana Global's Concentrated All-Purpose Cleaner has been engineered for the professional detailer. It is a heavy-duty, highly concentrated formulation that cleans the toughest stains, caked on dirt, grease, oil, and deep stains.

When used as directed, it can be custom diluted for specific detailing tasks including engine bays, tires, and wheels, bug splatter removal, paint correction decontamination, interior stain removal on textiles, and removing light stains on vinyl & leather materials.

Unlike some concentrated APC products, Americana Global's is a soap-based solution, meaning it's designed to clean build-up, grime, and stubborn debris. It can be used in foam cannons as a pre-wash soak (to help remove caked on debris and wax) – used in spray bottles or mixed in buckets for microfiber towel or scrub brush application.

### TASK:

Professional-grade cleaning agent – Highly-concentrated all-purpose cleaner. For professional use ONLY. Not recommended for DIY enthusiast.

### SIZE:

16oz & 1-Gallon Container

### HEAVY-DUTY CLEANER

This APC concentrate is a heavy duty cleaning agent – designed to be used by professional detailers or those with experience using concentrated solutions.

### REMOVES BUGS, TAR, AND STICKY DEBRIS

Our concentrated all-purpose cleaning solution removes the need to purchase alcohol-based cleaning agents. Simply mix at a ratio of 1:10, spray the liquid onto the vehicle surface, let it dwell for 30 seconds, and scrub off with a microfiber towel.

### GREAT FOR ENGINE BAYS & SUSPENSION DETAILING

Detailing engines and suspension parts that are caked with grease, oil, and road grime is always challenging. Our concentrated APC allows professional detailers and automotive experts to fine-tune their mix ratio for specific levels of dirt and grime.

## RECOMMENDED DILUTION RATIO

- 1:5** For Tires, Wheels, Suspension, and Engine Bays
- 1:10** For Heavy Soiled Interior (textiles), Bug Removal, and Paint Correction Decontamination
- 1:20** For Light Stains, Vinyl & Leather

**WARNING:** DO NOT SWALLOW. If ingested, please seek medical attention immediately.

CORRECT

The proprietary Americana Global Paint Correction systems utilizes state-of-the-art compounds and polishes - paired perfectly with the right cutting or finishing pad to achieve a flawless finish.

# 2.

## FINE CUT COMPOUND & POLISH

Americana Global Fine Cut Finishing Polish is the perfect final step in the multiple-stage paint correction process. It was engineered for superlative clarity and binary finishing capabilities. This silky-smooth finishing polish is infused with a proprietary blend of ingredients that produces fine cutting capabilities that removes imperfections left behind by previous cutting compound steps.

When paired with Americana Global's proprietary Orange, Black or Red foam pads, Fine Cut easily removes DA Haze from previous correction steps, swirls and wash marring, and micro marring. The end result is a flawless finish, that produces exceptional clarity, depth, gloss, and shine.

Once this final step is completed, we strongly recommend using Americana Global Surface Prep Spray - which has been customized to remove the oils and other agents from the vehicle's surface. It leaves behind a surgically clean surface - ready for ceramic coatings, wax, paint sealants, vinyl or paint protection film.

### TASK:

Finishing Cut & Polish - Best results are achieved after using our Medium Cut Compound to remove imperfections. Helps remove DA Haze, micro marring, & other microscopic imperfections.

### SIZE:

16oz, 32oz, 1-Gallon Container

### REMOVES DA HAZE

A common side-effect of using dual action orbital polishers is DA Haze. It's created by dirty or cross contaminated polishing pads, residue left behind by previous compounds, or using the incorrect combination of pads and abrasives. Our Fine Cut is formulated to remove this common imperfection, leaving behind a flawless finish.

### DELETE MINOR SWIRL MARKS

New cars from the auto sales lot are often embedded with micro swirl marks, due to using low-quality car washing supplies. The Fine Cut compound and finishing polish is infused with a micro-abrasive that will remove these tiny imperfections.

### THE AMERICANA GLOBAL PAINT CORRECTION SYSTEM

The Americana Global Paint Correction System simplifies the process of completing this time-consuming task. Each of our compounds and polishes work in conjunction with a series of Americana Global Cutting or Finishing Pads. This gives the detailer the flexibility to choose a pairing for specific paint conditions and correction tasks.

### APPLICATION

The Fine Cut polish pairs exceptional with Americana Global Medium Cut Orange Foam Pad, Fine Cut Black Foam Pad, and Micro Cut Red Foam Pad. For optimal results, we recommend using this system with dual action orbital buffing machines.

- Shake well before use.
- Always prime the pad prior to starting your correction.
- Use 4-6 pea size drops per 2-foot by 2-foot section.
- Spread the Fine Cut compound across the entire working area before engaging the buffer.
- Maintain a slow tempo and arm speed, with minimal pressure applied.
- Do NOT BUFF the product until it is dry. Keep the surface area wet.
- Remove residue with a clean microfiber towel.

**WARNING:** DO NOT SWALLOW. If ingested, please seek medical attention immediately.

# 2.

## MEDIUM CUT COMPOUND

The Americana Global Medium Cut compound is infused with the most advanced Diminishing Abrasive Technology available to professional detailers today. Our Medium Cut Compound was designed for maximum defect removal, longer product cycling, and impeccable finishing capabilities.

Our Medium Cut uses the same proven diminishing abrasive technology as our previously branded 1500 compound. As the compound is worked into the clear coat, the abrasives slowly break down into smaller particles – which produces a fast, yet gentle cutting action.

The end result – is a compound that produces less micro-marring and creates a quicker finishing step. It's a water-based compound, that produces less dust than previous formulations, with superior cutting control, and exceptional finishing abilities. This makes the Medium Cut Compound more eco-friendly, and compliant with evolving EPA regulations.

**TASK:**

Diminishing Abrasive Cutting Compound – For removing 1500-grit medium scratches, swirl marks, and paint imperfections. Can be used with orbital or rotary polishing machines.

**SIZE:**

**16oz, 32oz, 1-Gallon Containers**

### LOW DUST FORMULATION

One of the drawbacks of most diminishing abrasives compounds is the excessive dust produced during the working cycle. Our proprietary formulation helps to reduce the amount of dust created. This not only helps to keep your work area clean but reduces cross contamination – especially when you apply a professional ceramic coating or paint protection film.

### ONE STEP FOR MINOR IMPERFECTIONS

The Americana Global Medium Cut Compound is an exceptional single-stage solution for those factory-direct delivered vehicles seeking ceramic coatings or paint protection film. This compound also contains polishing oils and lubricants that helps to produce a superior finish. When paired with our Orange Medium Cut Foam Pad, it removes micro-swirls and paint imperfections, while polishing the surface to leave a superior shine.

### DEEP SHINE, DEPTH & GLOSS

The Americana Global Paint Correction System is intended to provide time-strapped detailers with a process that produces deep shine, depth, and gloss their customer's demand. This Medium Cut compound works great on hard or soft clear coats, gel coats, and aerospace paints.

### THE AMERICANA GLOBAL PAINT CORRECTION SYSTEM

We've formulated our compounds and polishes to work in conjunction with Americana Global's proprietary cutting and finishing pads. The Medium Cut Compound pairs exceptional with Americana Global Purple Hybrid Cutting Pad, Microfiber, Yellow Heavy Cut Foam Pad, and Orange Medium Cut Foam Pad. For optimal results, we recommend using this system with dual action orbital buffing machines.

## APPLICATION

This rapid cut and low dust formula are best paired with Americana Global Crazy Cut Hybrid Cutting Pads, Microfiber, or Max Cut Yellow Foam Pads & Medium Cut Orange Pads.

- Shake well before use.
- Always prime the pad prior to starting your correction.
- Use 4-6 pea size drops per 2-foot by 2-foot section.
- Spread the Medium Cut compound across the entire working area before engaging the buffer.
- Maintain a slow tempo and arm speed, with minimal pressure applied.
- Do NOT BUFF the product until it is dry. Keep the surface area wet.
- Remove residue with a clean microfiber towel.

**WARNING:** DO NOT SWALLOW. If ingested, please seek medical attention immediately.

# 2.

## ULTIMATE CUT COMPOUND

Americana Global Ultimate Cut is the next level of advancement for cutting compounds. Focusing on the minds of professional body shops and detailers, we set out to create an all-new formula that will give an extremely heavy cut, long work cycle, and high gloss finish; saving you time and money on follow up steps. This product replaces our diminishing abrasive 1000-grit compound. The new formulation utilizes nano-ceramic alumina abrasives – which helps tackle the most neglected paint conditions, gelcoat, and fiberglass.

It is a revolutionary formulation that allows easy wipe off with little dust and no sling. Additionally, the new nano-ceramic abrasives help detailers and body shops continue to cut until they've achieved the correction they desire. It likewise helps to reduce marring, which streamlines the finishing process, helping detailers save time and money. Americana Global Ultimate Cut works excellent with long-throw Dual Action Polishers and Rotary Buffers. It is body shop safe and VOC compliant.

### TASK:

Heavy Cutting Compound – for 1000-grit heavy scratches and paint imperfections. Pair with Americana Global Purple Hybrid Pad, Microfiber Pad, or Yellow Heavy Cut Foam Pad for optimal results. Can be used with dual action or orbital polishing machines.

### SIZE:

16oz, 32oz, 1-Gallon Containers

### NANO-CERAMIC ABRASIVE TECHNOLOGY

This new 1000-grit compound is formulated using nano ceramic abrasive technology. It helps produce a superior cut, with extended flexibility on cutting – without creating time consuming and paint damaging micro-marring.

### ECO-FRIENDLY WATER-BASED COMPOUND

Our Ultimate Cut compound is a water-based solution, which is VOC compliant and biodegradable. It can be used in automotive and marine applications.

### EASY TO WIPE OFF

Unlike older 1000-grit compounds, Americana Global Ultimate Cut Compound is easy to wipe off. The lack of excessive oil-based ingredients and fillers helps detailers wipe off residue easily – without leaving fillers which can mask the actual cutting performance.

### FORMULATED TO PAIR WITH AMERICANA GLOBAL PADS

We formulate all cutting compounds and polishes to work in conjunction with our proprietary Americana Global Cutting and Finishing Pads. This product pairs exceptionally well with our Purple Hybrid Cutting pad, Microfiber Cutting pad, and our Yellow Heavy Cut Foam Pad.

## APPLICATION

This rapid cut and low dust formula are best paired with Americana Global Crazy Cut Hybrid Cutting Pads, Microfiber, or Max Cut Yellow Foam Pads & Medium Cut Orange Pads.

- Shake well before use.
- Always prime the pad prior to starting your correction.
- Use 4-6 pea size drops per 2-foot by 2-foot section.
- Spread the Ultimate Cut compound across the entire working area before engaging the buffer.
- Wipe off residue and inspect the area prior to moving forward with a diminishing abrasive or final cut polishing compound.

**WARNING:** DO NOT SWALLOW. If ingested, please seek medical attention immediately.

# AMERICANA PADS

## EXACT FIT DESIGN

Each Americana Global Cutting or Finishing Pad features a precision fit design, that allows the pad to sit perfectly square on the 6", 5" or 3" backing plate. This reduces the excessive heat on the outer edge of the pad, which can create hot spots on the surface as you're correcting or finishing.

## SIGNATURE VENTILATION HOLES

We were the first company to precision manufacture ventilation holes that perfectly align on backing plates. This design permits air to circulate from the back of the orbital polisher to keep the pad cooler for longer periods of time.

The combination of these attributes helps the pads cut and finish better, run cooler, reduced delamination or glue failures, and last longer. This saves detailers time, allows them to complete paint correction projects quicker, without compromising quality.

## THE AMERICANA GLOBAL CUT / GLOSS SCALE

To simplify the process of picking the right pad and compound combination, we've created a simple to follow cut and gloss scale for each of our paint correction products. The goal is to pair a pad with a compound or polish - to eventually reach a score of 10 which completes the paint correction step.

## WHY IS EXACT FIT IMPORTANT?

**When pad overage or excess foam hangs outside the parameter of your backing plate it causes two problems.**

- First, the backing plate digs into the edge of the pad and begins to break down the edges of the pad over time. (Tearing itself apart)
- Second, when the edge of the pad is broken down it will cause delamination and glue issues of the hook and loop from the foam pad.

The exact fit design also allows for more consistent and even pressure of the pad to the paint surfaces. Even and consistent surface pressures equate to more correction power. This also allows the machine to run smoother by eliminating additional drag.

Americana Global exact fit pads with their proprietary ventilation holes allow the pad to run much cooler which for you means:

- Increased longevity and durability making our pads some of the longest lasting in the industry
- Increase the cycle time of your buffing liquids before the carrying solvents are broken down
- Increased air flow prolongs the life of the cell structure within the pad which means less pad breakdown
- Cooler temps resist common glue failure and delamination of the hook and loop

**\*PRO TIP** - We recommend using compressed air and a tornador to clean your pad between passes. This process can allow you to correct a full car with less pads. DO NOT WASH PADS in a washing machine or dryer.

ALWAYS keep pads in supplied packaging, stored in cool, dry areas, and clean after each use. DO NOT keep pads near any solvents or degreasers - as this will break down the backing adhesives and lead to pad failure.

*"The proprietary Americana Global Paint Correction systems utilizes state-of-the art compounds and polishes – paired perfectly with the right cutting or finishing pad to achieve a flawless finish."*

# 2.

## ULTIMATE CUTTING PAD

Our Medium Cut Foam Pad is appropriately named. This orange pad is the perfect blend of cut and gloss, which allows you to remove light swirl marks and marring, while also helping to improve the depth and shine you are looking to achieve. It pairs perfectly with our Medium Cut compound and can be used to finish your paint correction with our Fine Cut compound. For situations where the vehicle is new or has minor flaws, you can use the Medium Cut foam pad as a one-step polishing pad with our Fine Cut compound/polish. What Makes the Ultimate Cutting Pad Unique? This purple hybrid pad is truly unique. In fact, there is no other cutting pad manufactured today with the same attributes.

### HYBRID WOOL AND FOAM MATERIAL

The cutting action is produced by a hybrid wool and foam material, that allows you to cut quicker and finish with reduced micro-marring or pigtailling - which is common with pure cutting pads.

### ADAPTIVE TEMPERATURE FOAM

The foam interface is designed to help disperse heat throughout the entire pad. This keeps the pad cooler, which allows you to control your cut with superior accuracy and precision.

#### TASK

Removing swirl marks, paint imperfections, and etched clear coats. Recommended as the first step in paint correction. Pairs exceptionally well with our Ultimate Cut and Medium Cut Compounds.

#### SIZE:

6" & 5" Pads

# 2.

## MAX CUT PAD

Our microfiber cutting pad is designed to remove medium scratches, oxidation, and swirl marks found on clear coats, gel coats, and other solid substrates. The short, yet dense microfiber material quickly attacks imperfections, without leaving significant marring. It can be used with our Heavy or Medium Cut Compounds as the primary combination to remove damage in the paint correction process.

### SUPERIOR FINISHING ACTION

This microfiber cutting pad is designed to be used with our Ultimate Cut Compound - or the first step in a multiple stage paint correction. It's primary task is removing swirl marks, oxidation, and excessive etching in paint or gel coats.

### ADAPTIVE TEMPERATURE FOAM INTERFACE

The Max Cut pad features a thin foam interface that can help disperse heat throughout the entire pad. This keeps the pad cooler, which allows you to control your cut with superior accuracy and precision.

#### TASK

Cutting pad made for major swirl marks, etched clear coats, and paint imperfections. Can be used on clear coating paint, gel coat, and other hard surfaces. Pairs well with our Ultimate Cutting Compound.

#### SIZE:

6", 5", and 3" Pads

# 2.

## HEAVY CUT YELLOW FOAM PAD

The Americana Yellow Heavy Cut Pad is the most aggressive foam pad in our line-up. This dense foam is designed to remove holograms, clay-induced marring, and swirl marks caused by incorrect washing techniques. When paired with our Ultimate Cut Compound, it removes imperfections on harder clear coats and gel coats. Its exceptional for removing swirl marks on softer, more-sensitive clear coats when paired with our Medium Cut compound.

### SUPERIOR CUTTING ACTION

Our heavy cutting foam pad is designed to be used with our Ultimate Cut Compound or Medium Cut Compound – during the first step in a multiple stage paint correction. Its primary task is removing swirl marks, oxidation, and excessive etching in paint or gel coats.

#### TASK:

Task: High Density Yellow foam pad made for correcting swirl marks, etched clear coats, and paint imperfections. Can be used on clear coating paint, gel coat, and other hard surfaces. Pairs well with our Ultimate Cutting Compound & Medium Cut Compound.

#### SIZE:

6", 5", and 3" Pads

# 2.

## MEDIUM CUT ORANGE FOAM PAD

Our Medium Cut Foam Pad is appropriately named. This orange pad is the perfect blend of cut and gloss, which allows you to remove light swirl marks and marring, while also helping to improve the depth and shine you are looking to achieve. It pairs perfectly with our Medium Cut compound and can be used to finish your paint correction with our Fine Cut compound. For situations where the vehicle is new or has minor flaws, you can use the Medium Cut foam pad as a one-step polishing pad with our Fine Cut compound/polish.

### SUPERIOR CUTTING ACTION

Our Medium Cut Orange foam pad is designed to be used with our Medium Cut Compound – during the first step in a dual-stage paint correction. Its primary task is removing swirl marks, oxidation, and excessive etching in paint or gel coats. However, the pad also finishes exceptionally well.

#### TASK:

The Medium Cut foam pad is designed for correcting mild swirl marks, etched clear coats, and paint imperfections. Can be used on clear coating paint, gel coat, and other hard surfaces. Pairs well with our Medium Cut Compound and our Fine Cut Compound.

#### SIZE:

6", 5", and 3" Pads

# 2.

## FINE CUT BLACK FOAM PAD

The final step of paint correction is polishing – and our black fine cut pad is the entry point. This pad is firm enough to remove buffing swirls or mar-ring, while forgiving to help provide a perfect finish. It pairs exceptionally well with our Fine Cut polish but can also be used for soft clear coats with our Medium Cut compound for a quick one-step on newer paint jobs.

### SUPERIOR FINISHING ACTION

The soft density of our Fine Cut foam pad produces a superior finish during the final phase of paint correction. It's intended to be used with our finishing polish but maintains cutting ability to remove those tiny imperfections left by previous paint corrective actions.

AMERICANA  
GLOBAL

### TASK

The Fine Cut Black foam pad is a finishing pad, intended to help remove micro-imperfections during the final phase of paint correction. It's best paired with our Fine Cut Compound / Polish but can be used with our Medium Cut Compound to help remove smaller clear coat damage during a one-step correction.

### SIZE:

6", 5", and 3" Pads

# 2.

## MICRO FINISHING PAD

If your objective is to achieve extreme depth, gloss, and shine, our Micro Finishing Pad will get you there. This ultra-soft finishing pad is designed to enhance the gloss and reflection of the clear coat, to achieve extreme depth that is amplified when you apply a ceramic coating or paint protection film. It pairs perfectly with our Fine Cut polish.

### SUPERIOR FINISHING ACTION

The ultra-soft density of our Micro Finishing Red Foam pad produces a superior finish during the final phase of paint correction. It's intended to be used with our finishing polish to produce an elegant finishing touch to complete the paint correction and enhancement process.

AMERICANA  
GLOBAL

### TASK

The Micro Finishing Red Foam pad is our most luxurious finishing pad. It's an ultra-soft foam that pairs with our Fine Cut compound / polish to deliver superior depth, gloss, and shine.

### SIZE:

6", 5", and 3" Pads

## MAINTAIN

Our user-friendly and environmentally conscious Americana Global Maintenance products are scientifically formulated to work with multiple protective products – ranging from Nano Coatings to Paint Protection Films.

# 3.

## RINSELESS WASH SOAP

Americana Global Rinseless Wash is a highly concentrated hybrid, eco-friendly, rinse-free solution that has been formulated for multiple cleaning and detailing tasks. Our rinseless car wash is formulated to work on multiple substrates – ranging from ceramic coated vehicles, non-coated paint, glass, trim, chrome, vinyl, paint protection film, and more.

This revolutionary formula encapsulates dirt and debris, effectively pulling it from the surface. The high lubricity of this eco-wash helps to improve clean-up capability, while also reducing the potential of scratching when removing. Finally, a proprietary blend of polymers and ceramic ingredients helps to provide a thin layer of protection on the surface – for improved depth, gloss, and shine.

With multiple dilution ratios, applications, and diversity of use, Americana Global Rinseless Wash & Shine is the ultimate, cost-effective cleaning tool for detailers – from professionals to the DIY enthusiast.

### TASK

Eco-Friendly Rinseless Cleaning Agent. Can be used as a washing solution for cars, boats, airplanes, industrial equipment, and off-road vehicles. Also used as a glass cleaner, clay bar lubricant spray, and more.

### SIZE:

16oz, 1-Gallon Containers

### THE MOST FLEXIBLE DETAILING PRODUCT

The Americana Global Rinseless wash system is the most cost-effective and flexible detailing product in our arsenal. The highly concentrated formulation allows users to wash vehicles indoors or outside, without using water to rinse. It's used by professional detailers as a clay lubricant, glass cleaner, wheel cleaner, car wash, and more.

### ECO-FRIENDLY CAR WASH

Car owners living in regions with severe water restrictions understand the struggle of keeping their vehicles clean. Our Rinseless wash removes this hurdle and makes it easier than ever to maintain your vehicle's shine and luster. Simply use 2oz of Rinseless Wash per 3-gallons of water in a wash bucket.

### CLAY BAR LUBRICANT

The process of removing iron fallout and deep clear coat contaminants is simplified by using Americana Global Rinseless Wash as a clay bar lubricant. We recommend using 1oz of formula per 10oz of water – or 3oz per 32oz spray bottle.

### STREAK-FREE WINDOW CLEANER

For those searching for another use for our Rinseless Wash, consider using it as a streak-free window cleaner. Simply mix 1/2oz per 32oz spray bottle – or 1oz per two gallons of water, spray on dirty windows, and wipe off. Finish by using a drying towel for a streak-free and crystal clean window.

## FOR OPTIMAL RESULTS

When using as a rinseless wash, mix 1oz per two gallons of water. You can use a spray pump to saturate the surface first, then use the bucket method with a clean, plush microfiber towel. Wash from top to bottom, left to right, and one panel at a time. Dry with a clean and plush microfiber drying towel.

### Recommended Dilution Ratios:

1:32 - Rinseless Wash

1:256 - Glass Cleaner

1:10 - Clay bar Lubricant Spray

**WARNING:** DO NOT SWALLOW. If ingested, please seek medical attention immediately.

## CERAMIC GLASS CLEANER

Americana Global SiO<sub>2</sub> Glass Cleaner is a revolutionary, advanced, non-streaking glass cleaner that removes contamination while leaving a protective coating in place. This window tint safe glass cleaner contains ZERO ammonia-based ingredients yet creates a powerful cleaning effect on your glass. It breaks through the toughest grime such as oil, dirt, fingerprints, and other environmental contaminants.

Infused with SiO<sub>2</sub>, Americana Global's glass cleaner will add a lasting protective coating on your glass surface for months. It is safe to use on both interior and exterior glass surfaces as well as ceramic coated glass surfaces

#### TASK:

Window Tint Safe Glass Cleaner. This product has been formulated for Ceramic Pro KAVACA Window Films – and other professional-grade window tints. It is ammonia free, sourced from natural ingredients, and is eco-friendly.

#### SIZE:

16oz, 1-Gallon Containers

#### NON-STREAKING GLASS CLEANER

Our proprietary formula does not utilize ammonias, which commonly leave streaks on automotive windows. A blend of natural-occurring soaps and degreasing agents remove haze, surface debris, and contaminants – leaving behind a crisp and visually-enhancing automotive glass surface.

#### CERAMIC INFUSED

We've discovered a way to infuse silicon dioxide or SiO<sub>2</sub> into our automotive glass cleaner. This leaves a protective layer on top of the window or window film. For outside automotive glass, it helps improve the hydrophobic properties – which improves visibility during rain or snowstorms.

#### ECO-FRIENDLY AND SUSTAINABLE

This glass cleaner is 100% biodegradable – sourced from naturally-occurring elements. All Americana Global products are manufactured, packaged, and shipped from Southern California, which reduces our carbon footprint on shipping and logistics.

#### FOR OPTIMAL RESULTS

1. Shake well prior to use.
2. Always avoid spraying Americana Global SiO<sub>2</sub> Glass Cleaner on any surface that is warm to the touch – and never in direct sunlight.
3. Spray a fine mist over the area you wish to clean.
4. Wipe off with a clean glass-specific microfiber cloth.
5. Flip microfiber to dry side and wipe any remaining product for a streak free finish.

**WARNING: DO NOT SWALLOW.** If ingested, please seek medical attention immediately.

# PROTECT

04

Our Americana Global Protective solutions are designed to provide an extra layer of protection, increasing the depth, gloss, and shine of each vehicle – while protecting their financial investment.

# 4.

## DETAIL SPRAY

Americana Global Detail Spray is a ready-to-use waterless wash and detailing spray. Infused with a light amount of SiO<sub>2</sub>, and reduced solvents, our detail spray can be used between maintenance washes, as a stand-alone product on vehicles that are not coated or show / race cars throughout the day or night. It adds up to 2 months of hydrophobic protection while giving your vehicles paint a deep, rich shine and slickness.

Americana Global Detail Spray uses an encapsulating technology to capture and safely lift dirt, dust, road grime, fingerprints, and water spots from any surface of your vehicle leaving a scratch and streak-free finish. The anti-static polymers bond to existing protection to create a rich shine. This product is non-abrasive and non-silicone. It is also perfect for spot washing or complete vehicle washing without water and safe on all coatings, vinyl, and paint protection film.

### TASK:

Waterless car wash, intended to clean light debris off a vehicle's surface. Can be used on paint, vinyl, PPF, glass, wheels, tires, boats, carbon fiber, and other materials. Also, can be used as a clay bar lubricant spray or quick SiO<sub>2</sub> Boost Spray for improved hydrophobic properties, shine, and depth.

### SIZE:

**16oz, 1-Gallon Containers**

### EASY TO USE OUTDOORS

This revolutionary detail spray contains zero solvents – meaning it can be used outside and in direct sunlight. For warm surfaces, simply spray the product onto a microfiber towel, wipe on the surface, then use a clean and dry microfiber towel to remove the residue.

### NO SCRATCHES

This quick detail spray uses encapsulating technology, which lifts dirt and light debris from the vehicle surface. When used as directed, you won't create scratches.

### LEAVES A PROTECTIVE COATING

We've infused this detail spray with a small amount of SiO<sub>2</sub>, which leaves an ultra-slick finish once the product flashes. By removing the residue with a dry and plush microfiber towel, you'll have up to two months of added hydrophobic protection.

## FOR OPTIMAL RESULTS

1. Shake well prior to use.
2. While you can use this product outdoors and in direct sunlight, avoid spraying on hot surfaces.
3. Spray Americana Global Detail Spray onto a small area no more than 2 feet by 2 feet.
4. Rub into the surface using a soft, clean, and plush microfiber towel.
5. Turn cloth over to clean and dry side and buff to a high gloss shine.

**WARNING: DO NOT SWALLOW.** If ingested, please seek medical attention immediately.

# 4.

## TIRE & TRIM CONDITIONER

Americana Global Tire & Trim Conditioner is an innovative and eco-friendly protectant and shine enhancer. This water-based formulation has been engineered to produce a long-lasting finish with a deep luster and smooth shine.

The unique color-matching technology allows the product to darken weather-damaged tires and trim, helping to restore plastic and rubber materials to a like-new condition. It is an easy to apply, quick drying, and non-sling tire and trim conditioner.

### TASK:

Provides a Shine & Protects Rubber and Plastic Surfaces from damage caused by UV rays.

### SIZE:

16oz & 32oz Bottles

### NO SLING FORMULATION

We've engineered our tire and trim conditioner as a water-based product. This allows the tire shine to bond to the substrate and reduces the potential of slinging product on the side of your vehicle.

### RESTORES UV FADED SIDEWALLS

This innovative tire shine contains color-matching technology which helps to condition rubber and plastic materials. It helps to restore mild fading due to UV damage.

### ECO-FRIENDLY

Our water-based tire shine is a 100% biodegradable product. Each product is packaged using recycled and sustainable materials.

## FOR OPTIMAL RESULTS

- Clean the tire thoroughly with a high-quality tire cleaner. Dry completely prior to application.
- Apply Americana Global Tire & Trim Conditioner to an applicator and wipe on evenly.
- Smooth down any streaks or drops.
- Allow to dry for 30 minutes before using the vehicle. Allow 24 hours to dry before driving in the rain.
- For ultimate gloss and shine, apply 2 coats.
- Do NOT use tire shine products on motorcycle tires.

**WARNING:** DO NOT SWALLOW. If ingested, please seek medical attention immediately.

## AMERICANA GLOBAL PARTNERSHIP PROGRAM

### WHAT IS THE AMERICANA GLOBAL PARTNERSHIP PROGRAM?

The Americana Global Partnership Program offers top-tier commissions to those who sign up and actively market the products we sell through their channels. This program allows detailer's, automotive enthusiasts, or online drop shippers to earn passive income by selling or promoting our products to their customers and followers.

Each Americana Partner is provided a dedicated URL – that allows tracks all website visitors who click that link FOREVER – or use a dedicated promotional code associated with that affiliate. This link can be shared via Social Media posts, YouTube.com videos, embedded with banners or images, or assigned to a “BUY NOW” button.

This program allows you to promote and sell Americana Global Professional-Grade Car Care Products with a single click of the button – and without having to hold thousands of dollars of inventory.

### PROGRAM HIGHLIGHTS

#### Flat Rate Commission Structure from 10 to 25% on ALL PRODUCTS

- No expiration date on affiliate tracking of customers who click your affiliate link.
- Dedicated customers once they make a purchase and sign-up with their email.
- 100% Transparent Dashboard Access. Review ALL Sales and Commissions from a simple to navigate dashboard.
- Pay out directly to your PayPal account. \*Make sure to set up a PayPal account PRIOR to signing up please.
- Superior Marketing Support from Americana Global. We'll provide you with customized banners, marketing materials, video content, blogs, and other resources to help you educate your customers and followers.
